

San Francisco Bay Fish Contamination Workshop

A practical interaction training designed especially for educators:

Cooperative Extension EFNEP and FSNEP staff

WIC Staff

Community Outreach Workers

Church Liaisons

Wednesday, January 29, 2003

9:00 AM – 12:00 Noon

Mills Peninsula Health Services

Hendrickson Hall

San Mateo, California

Eating fish is good for you...but many fish caught in San Francisco Bay are contaminated with mercury and PCBs. These chemicals are of particular concern for pregnant women, nursing mothers and young children. You can't afford to miss this workshop if you work with special populations.

Guest speakers:

Ben Greenfield, MS, San Francisco Estuary Institute

Dr. Michael Greenberg, MD, MPH, San Mateo County Health Department

Name: _____

Agency: _____
